

SITE FURNISHINGS: SEATING

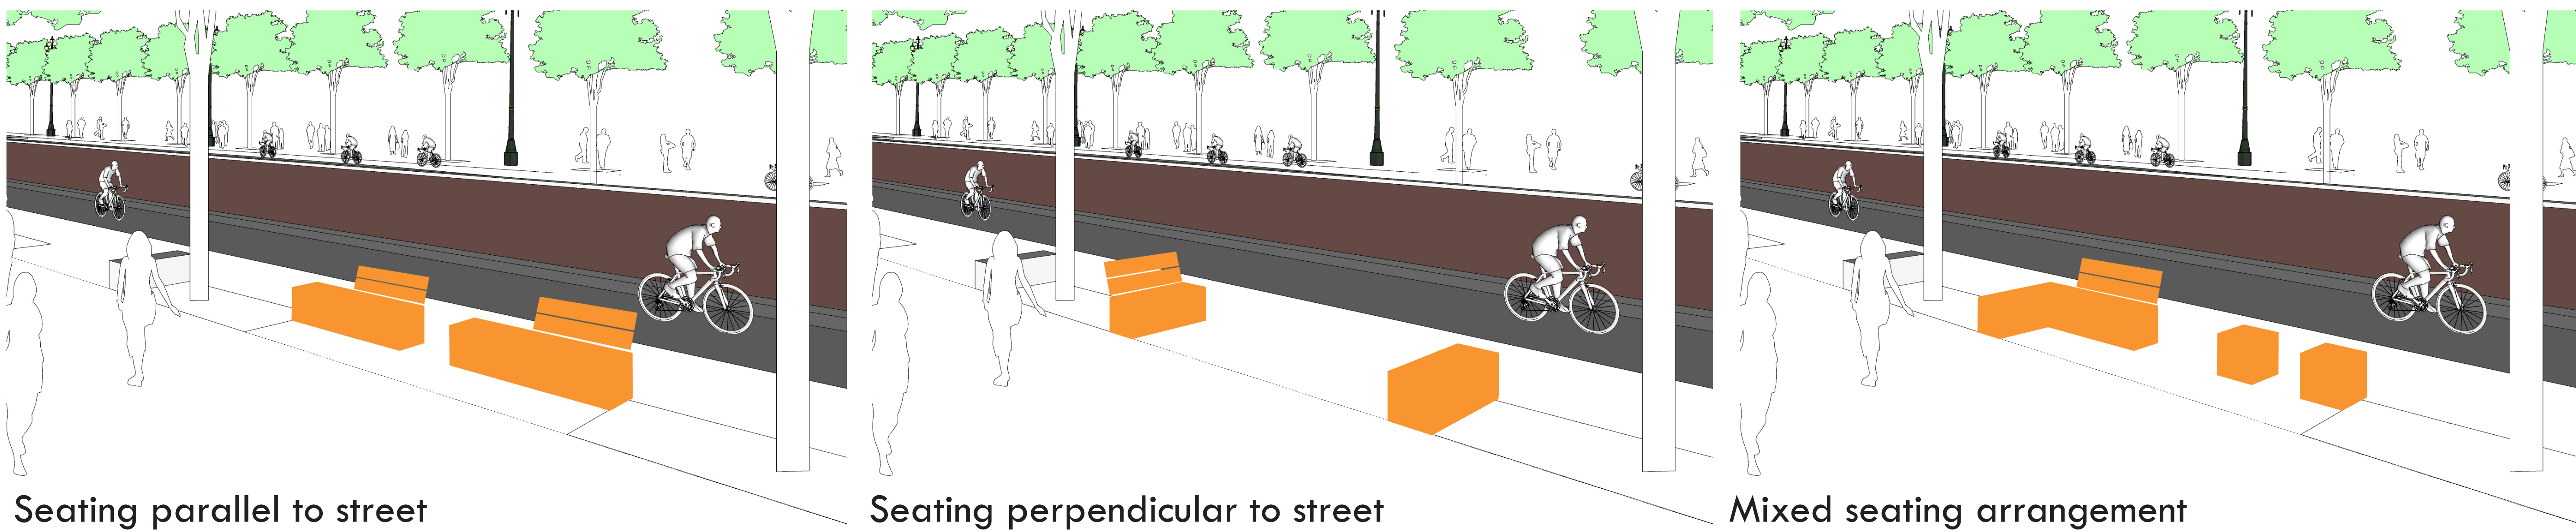

BETTER
MARKET
STREET

The furnishing zones on Market Street's sidewalks also provide the opportunity for seating, allowing people to socialize and linger. In keeping with the project's goal of sustainability, the existing Sierra White Granite curbs could be refashioned into seating elements. Alternatively, seating could be made from locally sourced or reclaimed lumber.

A 20 foot long furnishing zone can be designed and programmed to accommodate different amenities and uses to provide comfort and engagement along Market Street. The zone width varies from 4 to 10 feet.

SEATING LAYOUT There are numerous ways that seating elements could be arranged within the furnishing zone.
