

CAR FREE COMPLIANCE: 2021 OUTREACH

March – End of Year

- SFPD & PCOs
- Signage audit w/PD
- New VMS signs
- Traffic reporters
- Ride hailing & delivery
- New social media
- Regional transit agencies
- Ad buys digital, radio, print
- Bus tails
- Map updates

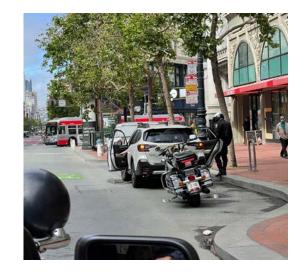

Going for a drive? Keep if off Market St. #SFMTA & #SFPD step up enforcement on #carfreemarketstreet

Creating a Better Market Street: Carfree Enforcement to Resume sfmta.com

1:30 PM · 4/20/21 · Salesforce - Social Studio

CAR FREE MARKET COMPLIANCE CAMPAIGN

Renewed Compliance Campaign launched March 29, 2021

- SFPD Traffic Company and SFMTA PCOs visible **5-6 days/week**
- More than 1323 stops by SFPD in March and April
- Positive feedback on police presence supports the Mayor's Mid Market Safety and Vibrancy Initiative
- Unauthorized drivers largely tourists from the Bay Area or in rental cars

| VIOLATION | Warnings | Citations |
|--------------------------------|----------|-----------|
| Fail to obey sign or signal | 400 | 89 |
| Drive in Transit Lane | 336 | 56 |
| Disobey traffic control device | 124 | 40 |
| Red Light Violation | 42 | 3 |
| Riding Scooter on sidewalk | 31 | 1 |
| Other | 128 | 32 |
| Overall Totals | 1092 | 239 |

SFPD contacts on Market St and adjacent cross streets 3/29-5/22/21

RECENT & UPCOMING IMPROVEMENTS

- May Two-way conversion of Jones Street
- July Muni-Only lane from 3rd to Main Street, speed limit to 20 MPH
- August Transit/Taxi/Bus interaction study
- **September** Required Right Turn westbound at Hayes Street
- **Fall** Two-way Spear Street
- TBD Required right turn westbound at Geary Boulevard

BETTER MARKET STREET QUARTERLY UPDATE

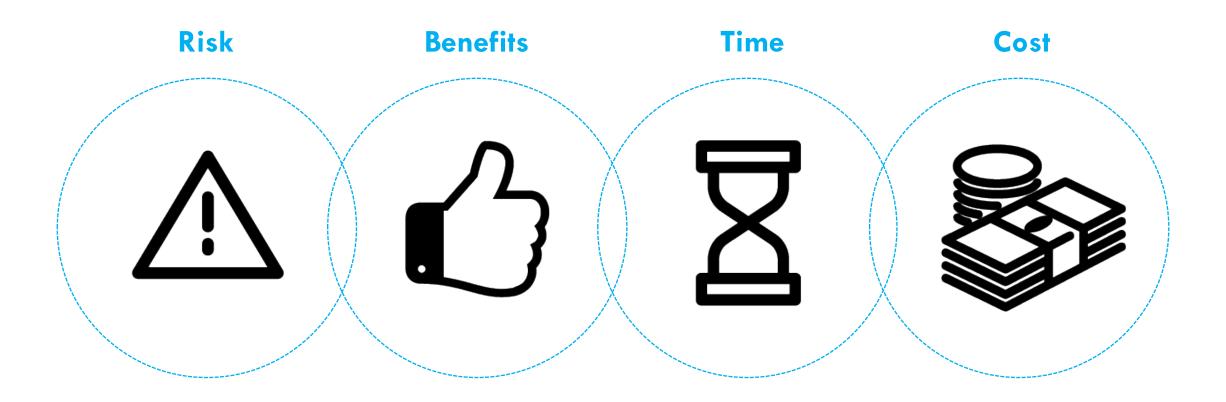

2020: SCOPE OF WORK 5TH TO 8TH STREETS

| Reline 3'x5' sewer | Traffic signal upgrade | Repaving |
|------------------------------------|-----------------------------|------------------------------|
| Replace sewer laterals | New overhead wires | Curb ramps |
| Reline 16" water | Traction power upgrade | Landscaping |
| Replace 8" water distribution line | New center boarding islands | Limited sidewalk replacement |
| AWSS | Track replacement | Street furniture |
| | BART grate replacement | |

CONSIDERATIONS

2021: CONSTRUCTION ALTERNATIVES

ALTERNATIVE 1:

"SAS"

Safety, Accessibility & Streetscape

ALTERNATIVE 2:

"COMBO"

Safety, Accessibility & Streetscape + Transit & Utility Upgrades

Safety, Accessibility & Streetscape

- Provide a full **traffic signal upgrade** to assist people who bike, walk, drive and take transit
- **Repave** the curb lane and full intersections, including the crosswalks, to provide a smoother ride for cyclists and safer crossing for pedestrians
- Construct ADA-compliant curb ramps to increase accessibility
- Construct **bulb outs** at Sixth and Hyde streets, and at Market/Mason/Turk to shorten crossing distances
- Replace **sidewalk at the corners** to reduce tripping hazards
- Streetscape improvements including new trees, benches and bike racks

Safety, Accessibility & Streetscape + Transit & Utility Upgrades

- Safety, Accessibility & Streetscape benefits PLUS
- Full scope of work from 8th Street through UN Plaza, including:
 - **Transit Improvements** Improve transit performance and reliability; longer, wider fully accessible boarding islands; stop optimization
 - **Bicycle Improvements & Traffic Calming** Prioritize curb lane in this area for people biking, taxis, and commercial vehicles; shift all transit to center lane for one block; install speed tables in curb lane
 - Upgraded utilities Sewer, water, AWSS, track, Overhead Contact System wires, and traction power

PROJECT TRADEOFFS

SAS includes critical surface improvements

but

would remove transit improvements and state of good repair.

SAS project is lower risk, fewer benefits.

- Does not include full project scope
- Will require a return to the street to repair existing utilities

Combination includes SAS
plus full scope of work
for 800 feet
but

is higher risk and has more construction impacts

Combination project is higher risk, but has more benefits

- Unforeseen conditions with underground utilities
- Staying on schedule
- Greater impact to businesses and the F-Line streetcars

CURRENT CONSTRUCTION FUNDING

| \$15M |
|----------|
| \$3.4M |
| \$2.7M |
| \$11.6M |
| \$3M |
| \$42M |
| \$22.1M |
| \$3M |
| \$102.8M |

REFERENCE SLIDES

UNDERGROUND UTILITY WORK - SEWER

To ensure reliable and resilient utility services for customers, the San Francisco Public Utilities Commission (SFPUC) will repair, rehabilitate and replace aging and seismically vulnerable underground sewer pipes.

- Many of the large sewer pipes in center of Market Street were made of brick in the 1880's
- Some smaller sewers were installed in 1970's next to BART station
- Sewer laterals are of varying age depending on when properties were built

WATER PIPELINE REPLACEMENT SCOPE

Water Pipeline on Market Street between 5th and 8th Street

- Replaces existing cast iron water distribution mains at the end of useful life
- Replace 3,200 linear feet of 8-inch ductile iron water distribution main
- Replace 600 linear feet of 12-inch ductile iron water distribution main
- Install 1,600 linear feet of cure in place liner within existing 16-inch main

Keeping the water flowing during and after construction

- Replace 8-inch pipe in existing alignment.
- Requires the installation of a temporary top line during construction

CRUCIAL WATER TRANSMISSION CORRIDOR

Water distribution and transmission pipelines along Market Street are critical to water delivery to San Francisco customers.

Seismic Vulnerability

- The existing pipeline joints are made of lead and will fail in an earthquake.
- Current pipeline construction standards use rubber gasket connections that are much more seismically reliable.

Auxiliary Water Supply System (AWSS) lines for firefighting will be relocated only in areas impacted by track/project work

Center Boarding Islands
